

PROJECT FACT SHEET

Moranbah North, QLD

CUSTOMER:

Anglo American

LOCATION

Moranbah North underground mine

Located in the northern part of the Bowen Basin in central Queensland, 16km north of Moranbah.

STATUS

Current
Start date: 1999

THE CONTRACT: OFF ROAD HAULAGE AND SITE SERVICES

Bis has provided off road haulage and site services for Anglo American's Moranbah North operation for more than 20 years.

The core remit includes stockpile management, train loading, haulage of rejects and road maintenance, as well as a critical portfolio of site services involving coal disposal services (design, construction and re-handling) and train load out responsibilities.

Additionally, the on-site Bis workshop plays an integral role in servicing and maintaining the fleet that services the scope of works.

PROJECT DESCRIPTION:

The Moranbah North mine is a Tier 1 asset in the Anglo American global portfolio of underground longwall operations, producing premium export metallurgical coal used in steel production.

The mine's reserves total 261 million tonnes of hard coking coal, making it one of the largest coal reserves in the world. Operations at Moranbah North are expected until 2033.

SCOPE OF SERVICES:

Onsite Operations:

- » Stockpile management
- » Management of coal disposal
- » Train load out

Site Services

- » Raw coal re-handle
- » Road maintenance, drains and sumps
- » Workshop
- » Fleet service and maintenance
