

# PROJECT FACT SHEET

## Moranbah North, QLD

### CUSTOMER:

Anglo American

### LOCATION

### Moranbah North underground mine

Located in the northern part of the Bowen Basin in central Queensland, 16km north of Moranbah. Land of the Barna people.

### STATUS

Dates of Operation: 1999 - 2024

### THE CONTRACT: OFF ROAD HAULAGE AND SITE SERVICES

Bis provided stockpile management, train loading, haulage of rejects and road maintenance, as well as a critical portfolio of site services involving coal disposal services (design, construction and re-handling) and train load out responsibilities over a 25 year period.

Additionally, the on-site Bis workshop played an integral role in servicing and maintaining the fleet that serviced the scope of works.

### PROJECT DESCRIPTION:

The Moranbah North mine is a Tier 1 asset in the Anglo American global portfolio of underground longwall operations, producing premium export metallurgical coal used in steel production.

The mine's reserves total 261 million tonnes of hard coking coal, making it one of the largest coal reserves in the world.

### SCOPE OF SERVICES:

#### Onsite Operations:

- » Stockpile management
- » Management of coal disposal
- » Train load out

#### Site Services

- » Raw coal re-handle
- » Road maintenance, drains and sumps
- » Workshop
- » Fleet service and maintenance
